REASONS FOR ALLOWANCE

1. Claim 1-20 are allowed.
2. Applicant's arguments, see page 4 lines 18-23 where the applicant argues that forming an image including inputting image data representing an image to reproduce an input level for each pixel of a plurality of pixels that reproduce the image by a plurality of print elements, mapping from the input level to a mapping level to provide multi level output that assigns none, one or more than one of the print elements corresponding to the pixel, and again on page 5 lines 1-7 where the applicant argues that an image processing device including an image data input device that inputs image data representing an image to produce an image level for each pixel of plurality of pixels that reproduce the image by a plurality of print elements, a mapping circuit that maps the pixel from the input level to mapping level, a drop assignment determination circuit that determines drop assignment values for the pixels from the mapping levels to provide a multi-level output value that assigns none, one or more than one of the print element corresponding to the pixel, filed 9/17/04, with respect to claims 1-20 have been fully considered and are persuasive.
